MOLDOVA CYBER WEEK 2020
ONLINE CONFERENCE & WEBINARS
Building a strong cybersecurity infrastructure in the New Normal

November 25-27, 2020,
**Chisinau, Moldova**

ABOUT MOLDOVA CYBER WEEK

Launched in 2012, "Moldova Cyber Week" (MCW) is an advanced intra-regional cyber security event held annually under the patronage of the Government of the Republic of Moldova and organized by the Information Technology and Cyber Security Service and Technical University of Moldova.

"Moldova Cyber Week" is dedicated to stakeholders working as part of the cybersecurity ecosystem and experiencing cyber threats on a day to day basis. The MCW ensures information and knowledge sharing among leading experts, policy makers, industry experts and the academia. The goal of MCW is to discuss main challenges related to cybersecurity, share experiences, exchange ideas, good practices, and build trust between the cyber community and the citizens. MCW is an opportunity to promote proper response to cyber threats and foster cooperation among cyber professionals. Within the "Moldova Cyber Week" we will discuss where we stand, what can be done, and share good practices, implemented solutions and initiatives with partners and experts.

MISSION

At the "Moldova Cyber Week", our mission is to create an open dialog between the countries from the region and the international community, which will share their needs and views, in order to create potentially new measures, legal frameworks, consolidating the necessary mutual trust between the Public and Private decision - makers the inter-governmental policy advisors and the strategic partners. In the midst of this global strategic puzzle, the event aims to help understand today's security reality by presenting condensed information in the regions and issues in the cyberspace. The event represents new thinking on how to shield your organization for a secure digital transformation and it aims to produce a multi-stakeholder consortium that brings together International Community, Government, Industry and Academic interests in an effort to improve the state of cyber security on both national and international level.
Building a strong cybersecurity infrastructure in the New Normal

The year 2020 and the impact of COVID-19 has made organizations adopt multiple technologies such as Cloud, Mobility, Internet of Things (IoT) and this has opened up a whole new avenue for cyber threats and crimes. Year 2020 has demanded a comprehensive, integrated and critical approach at addressing the cyber security challenges and all that taking into account the remote environment of working. The "Moldova Cyber Week" shall objectively address these challenges in the realm of national and regional contexts and explore further the challenges posed by cyber security in the age of the 'New Normal'.

The 'Moldova Cyber Week' presents an active participation platform, that integrates enlightening keynotes, in-depth panel discussions, networking opportunities, Q&A sessions and deep dives into actionable insights that strengthens cybersecurity strategies for the future. We are excited and look forward to your active participation over two intensive days where the attendees will get the opportunity to watch online the 8th edition of "Moldova Cyber Week 2020" the ONLINE CYBER SECURITY Conference (www.moldovacybeweek.md, www.gov.md) and actively participate in webinars .
